Summary

Driving operational excellence and AI-enabled transformation across aviation, logistics, and global supply chains. Senior Operations & Technology Leader with 31 years of experience, integrating 26 years in logistics and supply chain operations with 5 years in digital product management. I specialise in translating complex commercial and operational requirements into scalable technology solutions — including reverse logistics workflows, RMA cycles, and fleet management systems delivered for Bridgestone and MINDEF that improved ROI, asset visibility, and operational resilience across large fleets and data center-style environments. Global Operations & Digital Transformation Career foundation in global sales, operations, and business development, expanding distribution networks, securing multimillion-dollar contracts, and optimising procurement across APAC. Transitioned into ICT as an AI Analyst in Product Management, applying Agile and Scrum to deliver data-driven products. Expertise spans reverse logistics, RMA, data center supply chain resilience, ERP/IMS platforms, and AI-enabled decision frameworks that enhance logistics performance, cost control, and risk management at scale. Values-Driven Servant Leadership Lifelong learner and values-driven leader, shaped by over a decade of volunteer outreach ministry with New Creation Church and SG Care. I build high-trust, collaborative environments where innovation is grounded in empathy, service excellence, and long-term partnership with stakeholders.
