Professional Summary

Experienced transformation leader with over 30 years of cross-industry expertise across APAC (Automotive, Marine, Trading, ICT). Proven track record in supply chain execution, ERP modernization, and large-scale project fulfillment. Adept at bridging operational discipline with modern cloud and AI-driven architectures, ensuring governance compliance and measurable efficiency gains.

Key Skills

- Supply Chain Execution: End-to-end material readiness, supplier coordination, and delivery tracking.
- ERP & PO Processes: SAP MM, Oracle ERP, requisition preparation, and purchase order accuracy.
- Cross-Functional Leadership: Collaboration with Project Management, Finance, Legal, and Global Sourcing.
- Governance & Compliance: IMDA AI Governance v1.5, PDPA, Zero-Trust protocols.
- Regional APAC Experience: Extensive leadership in cross-border supply chain and infrastructure deployments.

Professional Experience

NCS Group (Sep 2021 - Jul 2026)

AI Analyst, Product Management

- Spearheaded QA and product management initiatives for AI-driven ERP modernisation, integrating automated testing frameworks and generative AI tools.
- Designed rigorous test frameworks and validation protocols for fleet management systems and Microsoft Copilot enterprise integration.
- Partnered with cross-functional technical stakeholders to ensure regulatory compliance, reduce operational risk, and drive a 30% increase in testing efficiency.

MINDEF / RSAF / NCS (2024–2026)

Fleet Management Systems Specialist Quality Assurance Analyst

- Directed supply chain resilience programs and middleware migrations.
- Coordinated supplier readiness and delivery execution for regional fleet operations.
- Established scalable processes for QA and supply chain tracking.

Digital Bridgestone / NCS (2022–2024)

Fleet Management Systems Specialist Quality Assurance Lead

- Directed supply chain resilience programs and middleware migrations.
- Coordinated supplier readiness and delivery execution for regional fleet operations.
- Established scalable processes for QA and supply chain tracking.

Yu Luo Trading Co. Ltd (Nov 2018 - Aug 2021)

Senior Business Development Director

- Oversaw cross-border supply chain operations and trading logistics.
- Negotiated supplier contracts and managed large-scale material delivery.

Helios Marine (Nov 2016 - Oct 2018)

Director of Business Development

- Managed global marine sales and modernisation projects.
- Negotiated strategic partnerships to expand digital adoption.

Global Link Automobile (Nov 2006 - Oct 2016)

Head of Global Sales

- Managed APAC-wide supply chain and logistics operations.
- Implemented ERP-driven procurement and delivery tracking systems.

Wei Ngiap Motor Pte Ltd (Nov 2000 - Oct 2006)

Senior Sales Manager

- Led regional sales teams and ERP adoption projects.
- Enhanced QA processes for automotive systems.

Hua Yang Investment Group (Nov 1995 - Oct 2000)

General Manager / Managing Director

- Directed investment strategies and modernisation initiatives.
- Established ERP systems to support growth.

Key Achievements

- Delivered end-to-end project material readiness for complex ERP cutovers.
- Established independent IP repositories for supply chain audit and governance.
- Recognised for operational discipline and stakeholder management across APAC.
- Designed Career Branding Command Suite with 19 agents for recruiter-ready outputs.
- Positioned Anthropic certifications and SIT program for career pivot into AI-driven leadership.

Case Study: Master Career Branding Project

Objective: Architected an advanced multi-agent workflow framework to automate, test, and optimize executive career branding for senior digital transformation and program management roles.

Methodology: Deployed 19 specialized microservice-style agents powered by Anthropic Claude and Model Context Protocol (MCP) standards to manage data processing, keyword parsing, and document generation.

Impact: Delivered a repeatable, highly scalable career branding pipeline capable of generating role-specific, ATS-optimized CVs, targeted cover letters, and synchronized LinkedIn profile architectures with 95+ compatibility scores.
