| <b>Phase 2: Observability &amp; QA</b><br>Telemetry, Schema QA, Memory    | TestRunner, OutputValidator<br>Monitoring, SessionState | —                                       | 📊 PHASE 2: OBSERVABILITY & TELEMETRY (DAYS 2-7) |                                            | —                                     |
| <b>Phase 3: Enterprise Connectivity</b><br>ERP Mapping, Jira/Slack MCP    | MigrationPlanner<br>EnterpriseConnectors                | —                                       | —                                               | 🔗 PHASE 3: ERP CONNECTORS & RADAR (WK 1-2) |                                       |
| <b>Milestone: Campaign Deliverables</b><br>Recruiter Outreach & Panels    | Headhunter_Radar<br>DocsMaintainer, KnowledgeGraph      | Package Brief                           | LinkedIn Featured                               | Direct Outreach                            | C-Suite Panels                        |

## SECTION 2: PHASED ACTIVATION BREAKDOWN & RECRUITER IMPACT

### PHASE 1: SECURITY & GOVERNANCE

- **Zero-Trust Bound:** MCP tools scoped to least-privilege tokens.
- **PDPA / GDPR Alignment:** Immutable audit logs generated by Agent-ComplianceAuditor.
- **HITL Oversight:** Approval gates set for C-Suite actions.

**RECRUITER IMPACT:** Demonstrates risk-aware AI governance to CTOs & Compliance Officers.

### PHASE 2: OBSERVABILITY & QA

- **99.9% Reliability:** Agent-TestRunner executes regression checks on prompt chains.
- **95%+ ATS Score:** Real-time fact-verification by Agent-OutputValidator.
- **Telemetry:** OpenTelemetry tracks token budgets & <300ms latency.

**RECRUITER IMPACT:** Proves ability to ship production-grade, zero-hallucination systems.

### PHASE 3: ENTERPRISE INTEGRATION

- **ERP Modernization:** Agent-MigrationPlanner maps SAP MM & Oracle transitions.
- **MCP Connectors:** Direct integration with Jira, Azure DevOps & Slack.
- **Knowledge Graph:** Preserves domain knowledge with zero doc debt.

**RECRUITER IMPACT:** Establishes candidate as an executive who bridges P&L with modern tech stacks.
