

SAM LEONG

Senior Program Manager | Principal Transformation Lead | Digital Supply Chain & ERP Modernisation Specialist

Singapore | +65 [Contact Number] | samleong2828@email.com | LinkedIn: /in/samleong2828

EXECUTIVE SUMMARY

Resilient Global Digital Orchestrator and Senior Program Manager with over 30 years of cross-industry domain leadership across APAC (Automotive, Marine, Trading, and ICT). Specializing in bridging legacy enterprise resource planning systems (SAP MM, Oracle) with modern cloud architectures, agentic workflow automation, and secure API integrations. Proven track record of directing high-stakes ERP modernizations, driving zero-downtime SLA cutovers, and delivering quantifiable operational efficiency uplifts (15%–20% supply chain throughput gains, 30% QA testing efficiency boost). Committed to rigorous governance frameworks aligned with Singapore IMDA AI Governance v1.5, PDPA, and Zero-Trust protocols.

CORE COMPETENCIES & TECHNICAL EXPERTISE

Enterprise Program Management:	PMO Leadership, Agile/Scrum (Certified Scrum Master PSM I & II), Zero-Downtime Cutovers, Risk Mitigation & SLA Assurance.
ERP & Supply Chain Modernisation:	SAP MM, SAP PI/PO to BTP Integration Suite Migration, Cloud Connector, Fleet Management, Inventory Optimization (EOQ).
Agentic AI & Architecture:	Model Context Protocol (MCP) Gateways, Anthropic Claude API, Python Supply Chain Optimization, M365 Copilot Integration.
Governance & Compliance:	Singapore IMDA AI Governance v1.5, PDPA, Zero-Trust Architecture, Human-in-the-Loop Execution Anchors (HEAR).

PROFESSIONAL EXPERIENCE

Enterprise Transformation & Digital Supply Chain Practice Singapore | 2021 – Present

Senior Program Manager & Digital Transformation Lead

- Directed end-to-end enterprise transformation programs and SAP MM supply chain workflows across multi-industry APAC operations, aligning technical execution with regional business strategy.
- Spearheaded integration strategy and modernization assessments for legacy enterprise middleware, managing transition pathways from SAP PI/PO to cloud-native SAP Integration Suite ahead of 2027 end-of-support deadlines.
- Engineered secure Model Context Protocol (MCP) and Python-based optimization wrappers, safely connecting enterprise databases with advanced AI orchestration tools under strict zero-trust parameters.
- Enforced rigorous regulatory compliance by integrating Singapore IMDA AI Governance v1.5 and PDPA standards into technical workflows, ensuring zero data leakage across all automated operations.
- Achieved a verified 15% reduction in equipment downtime and accelerated inventory replenishment velocity, translating technical modernizations into hard financial savings.

NCS Group & Regional Technology Enterprises Singapore | 2010 – 2020

Senior Program Manager / Transformation Lead (Enterprise Solutions)

- Directed complex enterprise software deployments, system integration initiatives, and quality assurance modernization frameworks across regional client engagements.

- Transformed enterprise quality assurance and test validation frameworks as a Certified Scrum Master (PSM I & II), eliminating operational bottlenecks and delivering a 30% boost in QA testing efficiency.
- Bridged disparate on-premise ERP backends (SAP MM, Oracle) with secure API gateways and automated data pipelines, replacing fragile manual batch processes with resilient, event-driven architectures.
- Managed multi-disciplinary technical and operational teams across regional APAC hubs, instilling high-accountability delivery practices and structured governance reporting.

Cross-Industry Operational Leadership (Automotive, Marine, Trading, ICT)

APAC Region | 1995 – 2009

Global Operations & Supply Chain Director / Principal Lead

- Directed international supply chain operations, logistics networks, and core ERP inventory systems across 8 countries, ensuring operational resilience through multiple economic cycles.
- Owned procurement, material readiness, vendor coordination, and high-stakes material handovers for large-scale industrial deployments.
- Established repeatable supply chain operating procedures, vendor SLA metrics, and compliance controls that significantly lowered inventory holding costs.

EDUCATION & PROFESSIONAL CERTIFICATIONS

- **Upcoming Certification / Programme:** SIT Digital Supply Chain Programme (Sep – Nov 2026)
- **Professional Scrum Master (PSM I & II):** Scrum.org
- **AI & Enterprise Architecture:** Advanced Model Context Protocol (MCP) Architecture, Claude API Orchestration, Python Enterprise Automation.
- **Tertiary Education:** Bachelor of Business / Engineering (International Operations & Management).
